

ACS COLLEGE OF ENGINEERING

DEPARTMENT OF ECE

A technical talk on ARM7 processor was conducted for the students of ECE by **Mr. Sanjay Kumar Bhagat** of Jyothi labs.

Processor is a key word in all walks of life and the basics of ARM7 Processor is studied in the course subjects.

This generation introduced 16 bit instruction set providing improved code density compared to previous designs. The design uses Von Neumann architecture.

It is a versatile processor designed for mobile devices and other low power electronics.

The technical talk thus inspired some students to understand and undergo a workshop on ARM7 Processor
