

Aeronautical Engineering
organises
Workshop on
“3D printing Technologies”
Resource Person:Mr.Venkataram P.S
Accelary Aerospace
6th August 2018

VENUE: Aeronautical Department Seminar hall

ABOUT THE SEMINAR :

The idea of Accelary Aerospace is leading services providers in the field of practical education training on schools and college level. We believe in implementing new ideas and technology. The purpose is to bridge gap between technology and learning by working closely with every child to develop an individual growth experience.

Accelary Aerospace is a venture committed towards future innovators through an innovative learning and empowering education by successfully integrating Science, Technology, Engineering and Mathematics (STEM) for schools and colleges.

TALK HIGHLIGHTS:

- Introductory lecture on 3D printers.
- Different types of 3D printers.
- Concept of 3 Dimensional objects.
- Introductory to 3D software.
- CAD modelling of simple designs.
- Demonstration of 3D printers.
- Students to develop 3D model in CAD
- Demonstration of 3D printing and print the best model
