ABOUT THE WORKSHOP

To investigate a research problems and writing high impact factor journal needs an effective effort with a bit of organized manner. It will provide necessary information to solve the problem and is useful, feasible, unambiguous and informative to young scholars. The research guidance will be given on developing skills that are essential for a researcher such as problem solving,

leadership and assertiveness as well as building greater self-awareness of researcher's learning and working styles. This workshop is expected to fulfill the need of students, research scholars and academicians on how to write a high impact research article and funding research proposal with the expert from UK. The following topics will be addressed.

- How to get started on a research work
- Literature review & Research problem selection
- Identification of research scope
- Planning and Time management
- Grant writing - How To Write A Research Proposal
- Research design, data analysis & statistics
- Scientific Method and Experimentation Skills
- Critical thinking and validity of results
- Plagiarism findings and conclusion of the studies.
- Report Preparation
