

ACS College of Engineering
Department of Electronics & Communication Engineering
A Report on Two-day workshop - “Open Hardware Prototyping”

A two-day workshop on “**Open Hardware Prototyping**” was conducted in the Department of Electronics & Communication Engineering, ACS College of Engineering by **Mr. Prathik, Logic Hive solutions Pvt Ltd, Mysuru on 3rd and 4th March 2016.**

The workshop was based on Arduino board a part of upcoming technologies and knowledge which is a step towards the growth of an Engineer. It was guided by a young team and that showed that everything is attainable. Hardware was the centre of workshop but it was surrounded by numerous soft skills which made the workshop take us one step ahead.

Working in a team made learners to work together to attain a common goal. We had students of Mechanical and Bio-Medical Engineering participating in it which took the total strength of workshop to 90. Appreciation to **Prof Prasanna Kumar and team, Department of ECE** for conducting the workshop in a large scale.
