

# ACS COLLEGE OF ENGINEERING

## DEPARTMENT OF ECE

Abhinaya .S gave the basics of labview and helped the students to implement simple logic circuits, logic gates and some Boolean expressions.

Labview is a tool to understand and analyze the Analog and Digital circuits, this gives us an easy understanding of the circuits and operation of the circuits. Hands on experience were provided and all the students had an individual hand on. The events were attended by all the Electronics and Communication Engineering students in the laboratory of the department.
