<b>Resource Person</b>	:	<b>Dr.A.Sreedhar Kumar, Asst General Manager, ICFAI Group.</b>

## About the Talk

The seminar on “CAMPUS TO CORPOARTE” was delivered by Dr. A. Shreedharkumar, Assistant ICFAI manager, ICFAI group. Which is very important to be known for getting into the corporate world?

Initially we started our session with the difference between “campus” and “corporate” which stated how the role being student in the campus, a four walled atmosphere with responsibilities like assignments, exams, individual works, laboratories etc differs from being an employee in the corporate world with huge competition each days, deadlines, projects, presentations, team works etc.

Later on the session continued with the small activity called “case study”, the activity showed us how the team work is performed with several perceptions and concluding it to one final decision. And how to solve case study with better and a long term solutions rather than getting temporary solutions which later on leads to face many problems which is really useful for our career growth and succeed in getting into the corporate world.

The session taught about the un-employability skills which went like,

1. People skills: which deals with communication?
2. Persuasion skills: which deals with convincing, influencing and many other abilities?
3. Prioritization skills: which deals with team work.
4. Problem solving and decision making: which deals with long and best solutions?

Then we had the guidance on higher studies what all homework needed, like aiming for the good institutes which helps in our career, skills development, passion growth and finally getting succeeded by the dreams we made. The seminar really made a huge positive impact with clear and more information about the corporate needs and deeds and how to successfully overcome.
